

### **Instructions for Screening:**

There is a smooth side and a rough side to the screen.  
Place the smooth side of the screen in contact with the surface  
(rough side up) and lightly lay in place –low tack tape can hold it in to  
position.

#### **Tip:**

Masking tape can be used to create a frame around the  
entire screen.

Apply Smooth paint or colored fondant coloring gel  
Use a squeegee , your finger, or a wide brush to spread and gently force  
your paint medium through screen.  
Then carefully remove the screen from the surface and place in a pan of wa-  
ter.

**Tip:** Gently lift the corner of the screen to ensure clean coverage Do not move  
the screen until complete coverage has been  
Accomplished.

**Important:** When finished, put screen in container of tepid  
Water. You do not allow the paint or gel product to dry on the  
Screen.

Keeping the screen clean ensures the extended life of the screen.
